POMME DE TERRE ONE WATERSHED, ONE PLAN

Participation and Public Awareness Survey

| | l. | Please pro | ovide your | thoughts of | on the following | ng water reso | ource-related of | questions: |
|--|----|------------|------------|-------------|------------------|---------------|------------------|------------|
|--|----|------------|------------|-------------|------------------|---------------|------------------|------------|

| | Do you live near a stream, lake, river or wetland? If so, please identify which body of water. | | | | | | |
|---|---|--|--|--|--|--|--|
| • | What have you noticed about this body of water in the last five to ten years? Please explain. | | | | | | |
| | | | | | | | |
| | | | | | | | |
| | | | | | | | |
|) | How important is the quality of the water and the health of the ecosystems within this waterbody? | | | | | | |

3. How important is the quality of the water and the health of the ecosystems within this waterbody?

| Very important | Somewhat important | Slightly important | Not at all important |
|----------------|--------------------|--------------------|----------------------|
| | | | |

4. How important are the following water resources to your quality of life? Please place an X or ✓ in the appropriate box.

| | Very important | Moderately important | Slightly important | Not at all important |
|---|-------------------|----------------------|-----------------------|----------------------|
| Surface Waters: | | | | |
| streams or creeks | | | | |
| lakes | | | | |
| rivers | | | | |
| wetlands | | | | |
| Drainage Ditches | | | | |
| Flood Control (impoundments, dams, levies, etc) | | | | |
| Groundwater Resources: | | | | |
| drinking water | | | | |
| irrigation water | | | | |
| industrial use waters | | | | |

| Algae blooms in lakes Aquatic invasive species such as curlyleaf pondweed, Eurasian watermilfoil, carp, etc. Turbidity or sediment levels in streams or rivers that affect flow capacity and in-stream habitat Failing septic systems that release pollutants to surface waters Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | | Very important | Moderately important | Slightly important | Not at all important | No applic |
|--|---|----------------|----------------------|-----------------------|----------------------|--------------|
| Boating, Canoeing, and Kayaking Swimming Fish and wildlife habitat Please rate the severity of the following concerns in your community during the next 5 to 10 years place an X or ✓ in the appropriate box. Very Severe Slightly Severe Se | gricultural Drainage | | | | | |
| Swimming Fish and wildlife habitat Please rate the severity of the following concerns in your community during the next 5 to 10 years place an X or ✓ in the appropriate box. Very severe S | lood Water Conveyance | | | | | |
| Swimming Fish and wildlife habitat Please rate the severity of the following concerns in your community during the next 5 to 10 years place an X or ✓ in the appropriate box. Very Severe S | ishing, Hunting, and Trapping | | | | | |
| Fish and wildlife habitat Please rate the severity of the following concerns in your community during the next 5 to 10 years place an X or ✓ in the appropriate box. Very | oating, Canoeing, and Kayaking | | | | | |
| Please rate the severity of the following concerns in your community during the next 5 to 10 years place an X or ✓ in the appropriate box. Very | wimming | | | | | |
| Algae blooms in lakes Aquatic invasive species such as curlyleaf pondweed, Eurasian watermilfoil, carp, etc. Turbidity or sediment levels in streams or rivers that affect flow capacity and in-stream habitat Failing septic systems that release pollutants to surface waters Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | ish and wildlife habitat | | | | | |
| Aquatic invasive species such as curlyleaf pondweed, Eurasian watermilfoil, carp, etc. Turbidity or sediment levels in streams or rivers that affect flow capacity and in-stream habitat Failing septic systems that release pollutants to surface waters Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | ace an X of Y in the appropriate box. | _ | _ | | | No applic |
| pondweed, Eurasian watermilfoil, carp, etc. Turbidity or sediment levels in streams or rivers that affect flow capacity and in-stream habitat Failing septic systems that release pollutants to surface waters Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | lgae blooms in lakes | | | | | |
| that affect flow capacity and in-stream habitat Failing septic systems that release pollutants to surface waters Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | | | | | | |
| Eroding banks on streams, rivers, or lakes Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | urbidity or sediment levels in streams or rivers nat affect flow capacity and in-stream habitat | | | | | |
| Groundwater quality and supply Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | | | | | | |
| Soil loss from agricultural fields Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | roding banks on streams, rivers, or lakes | | | | | |
| Health & sustainability of soil resources Frequency of flooding Economic losses due to flooding | roundwater quality and supply | | | | | |
| Frequency of flooding Economic losses due to flooding | oil loss from agricultural fields | | | | | |
| Economic losses due to flooding | ealth & sustainability of soil resources | | | | | |
| | requency of flooding | | | | | |
| | conomic losses due to flooding | | | | | |
| Impacts of land development | npacts of land development | | | | | |
| Other issues, please define below: | Other issues, please define below: | | | | | |

| 7. | Please rate the following water resource management practices a healthy water resources in the Pomme de Terre Watershed. Please | • | | |
|----|---|-------------------|------------|-----|
| | Very Mod | lerately Slightly | Not at all | Not |

| | Very important | Moderately important | Slightly important | Not at all important | Not applicable |
|---|-------------------|----------------------|--------------------|----------------------|----------------|
| In-lake management including fish stocking, carp control, weed management, etc. | | | | | |
| Farming practices including no till, strip till, cover crops, rotational grazing, etc. | | | | | |
| Construction of water quality improvement practices (grassed waterways, grade stabilization structures, etc.) | | | | | |
| Natural areas preservation and restoration including wetlands, forest, prairie, etc. | | | | | |
| In-channel activities such as bank stabilization, two stage ditches, river restorations, etc. | | | | | |
| Controlled Tile Drainage | | | | | |
| Existing regulatory controls (buffer requirements on public ditches, road ROWs, shoreland setbacks, etc.) | | | | | |
| Controls on regulated facilities discharging to water resources (waste water treatment plants and industry) | | | | | |
| Stormwater management requirements for new development or redevelopment in the watershed. | | | | | |

- II. Let us know how we can make your involvement in this project more convenient and engaging.
- 8. How do you prefer to <u>participate in</u> community or natural resource planning activities? Please rank the following choices; with **1 being your most preferred**, and **8 being least preferred**.

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 |
|---|---|---|---|---|---|---|---|---|
| Direct Mail | | | | | | | | |
| Email | | | | | | | | |
| Website | | | | | | | | |
| Social Media (Facebook, Twitter, Blogs) | | | | | | | | |
| Public workshops or trainings | | | | | | | | |
| Public meetings/hearings | | | | | | | | |
| Federal Agencies or Extension | | | | | | | | |
| None | | | | | | | | |
| Other (please describe below): | | - | • | • | • | | • | |

| 9. | How do you prefer to obtain information about your community and watershed? |
|----|--|
| | Please rank the following choices; with 1 being your most preferred, and 12 being least preferred. |

| | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|---|---|---|---|---|---|---|---|---|---|----|----|----|
| Direct Mail | | | | | | | | | | | | |
| Email | | | | | | | | | | | | |
| Website | | | | | | | | | | | | |
| Social Media (Facebook, Twitter, Blogs) | | | | | | | | | | | | |
| Local group meetings | | | | | | | | | | | | |
| Local TV Station | | | | | | | | | | | | |
| Local Radio | | | | | | | | | | | | |
| Local Newspaper | | | | | | | | | | | | |
| Personal communication | | | | | | | | | | | | |
| Public meetings | | | | | | | | | | | | |
| FSA, NRCS, or Extension | | | | | | | | | | | | |
| None | | | | | | | | | | | | |

10. When would it be most convenient for you to attend future meetings about the Pomme de Terre One Watershed, One Plan? Please rank the following choices; with 1 being your most preferred, and 5 being least preferred.

| | 1 | 2 | 3 | 4 | 5 |
|-------------------|---|---|---|---|---|
| Weekday Morning | | | | | |
| Weekday Mid-day | | | | | |
| Weekday Afternoon | | | | | |
| Weekday Evening | | | | | |
| Weekends | | | | | |

11. Please pick the options that best describe you. Please select all that apply.

| Landowner-Farmer | |
|---|--|
| Tenant-Farmer | |
| Absentee Landowner | |
| Urban homeowner | |
| Lakeshore homeowner | |
| Rural homeowner | |
| City/township staff | |
| County/Local government staff | |
| State Agency Employee | |
| Federal Agency Employee | |
| Student - college | |
| Student – high school | |
| Outdoors-person (hunting, fishing, hiking, etc) | |
| Other, please describe below: | |

| 12. | In which county do you live? | |
|--|--|---------------------|
| | Big Stone | |
| | Douglas | |
| | Grant | |
| | Otter Tail | |
| | Stevens | |
| | Swift | |
| | What is your gender? Male Female | |
| 14. | What is your age? | |
| | Under 18 18 to 25 26 to 35 36 to 45 46 to 55 56 to | 70 71 or older |
| 15. | How familiar are you with the One Watershed One Plan planning process? | |
| | Very Familiar Somewhat Familiar A little Familiar | Not Familiar at all |
| | Have you participated in other watershed planning processes? Yes No If yes, please list the planning processes in which you've participated: | |
| III. Please provide any other comments you may have below: | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

Thank you for taking the time to complete this survey! Please submit any additional comments or questions via e-mail to:
